

Demonstratives: Large Format Exhibit Boards

ThemeVision routinely utilizes mounted boards to show your argument in a compelling manner.

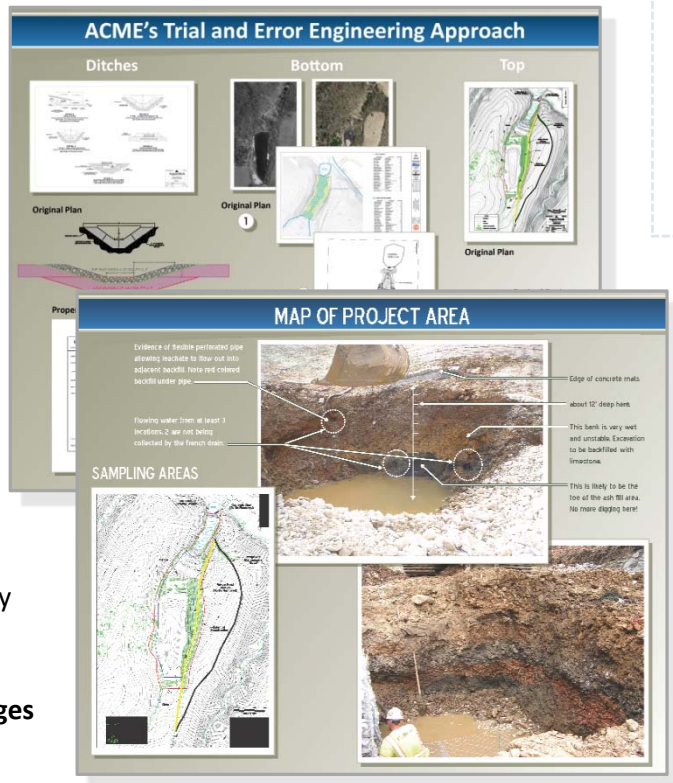

PowerPoint and TrialDirector may be the presentation formats of choice today, but don't forget about the tried-and-true workhorse, printed trial exhibit boards.

ThemeVision graphic designers still encourage the use of boards in many litigation presentations. The impact and importance of well-designed printed trial boards cannot be overlooked.

Imagine the unforgettable impression a 4-foot-wide depiction of a construction flaw can have when it's on display and is referenced while a litigator questions witnesses about the details.

Large format printed boards can effectively emphasize your case themes in:

- Pullouts
- Enlargements
- Overviews
- Cut-aways
- Annotated Images
- Stylized Images
